

Do Care Movement

We have always cared.
Now we do so with greater focus,
greater impact, and a shared
vision.

Introduction

Caring is part of Provital's DNA.

Since 2009, we have been partnering with NGOs and nonprofit organizations to improve conditions in the communities they serve and contribute to their development.

Do Care Movement is the framework that gives this commitment its name, structure, and continuity.

Its 3 pillars

Do Care Movement organizes this care around three pillars:

CareTogether → Actions with our key partners

Collaborations that involve us and create shared impact.

CareBeyond → Actions with other partners

Active social engagement beyond Provital.

CareCommitment → Actions for project partners

Nature experiences that promote health, well-being, and connection.

Core Projects

Example

**We take action for people because
caring is what drives us.**
